BRINGING TECHNOLOGY
TO THE WORLD

BUSINESS SERVICES BROCHURE

CORPORATE SOLUTIONS

Infrastructure Management

We can manage and maintain the multi-vendor parts of your network that users never see but are vital to its being.

Internal Project Management

Clear the clutter you may have that you just cant seem to get rid of. Let us "spring clean" those old IT projects while you handle your daily case loads.

Systems Management

Stay focused on the business at hand. Let Comtex manage the systems that you rely on to succeed.

Provisioning Services

We work with your business to identify the hardware, software and networking equipment needed to fulfill your mission.

Deployment Management

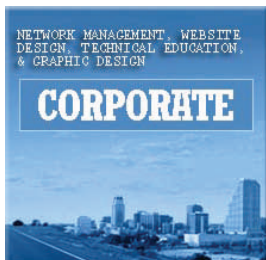

Comtex has the people, processes and the global reach you need to deploy new desktop, network and systems technology successfully.

Security Management

Hackers, worms, viruses -- we have the solutions to help forecast and deflect threats in real-time within and outside your company.

About Comtex Corporate Solutions

Built on a foundation of unrivalled technical expertise and proven operational processes, our managed IT solutions are SLA guaranteed, scalable and designed to reduce IT costs while mitigating risk of service disruption.
